Attention: Mr. R. W. Jacobsson, Senior Lease Agent

Gentlemen:

Mr. Jenner called yesterday, and we wish to correct our letter of March 8. We do wish to continue the old Permit 87616 (new 206,267), but only as to the 1" water pipeline which is located at MP6 + 1434'.

Sincerely,

Donald O. Norman

Attention: Mr. R. W. Jacobsson, Senior Lease Agent

Gentlemen:

Thank you for your letter of March 3, 1972. Unfortunately we have been delayed in responding to Mr. Jenner's letter of December 27; otherwise we could have cleared up several assumptions that are not correct and have been picked up by the agreements you forwarded.

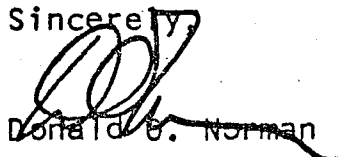

First: The correct name of the Joint Venture is Quendall Terminals; the venturers are Puget Timber Company, and Altino Properties, Inc.

Second: We do not wish to continue the old Permit 87616 (new 206,268) as you no longer wish to permit cars to be spotted for loading on your Quendall siding. This would render such crossing permit valueless.

Therefore, at present we desire only a crossing permit as shown in your 206,267. However, would you please revise the name of the permittee.

In addition, we discussed our landscape plans which involve fencing and screening the right-of-way from view and sound. Most planting would be adjacent to your right-of-way, but it is desirable that some be located on it to form a more natural line. With whom would be discuss these plans for authority to proceed? Our plans call for the property to be phased from its present industrial use to something in keeping with water oriented recreation. Also included are plans for a grade separation to be constructed on or about the location of the old Permit No. 32768.

Sincerely,

Donald B. Norman
